1. Resumo Executivo

On July 6, 2026, the automated CTI collection pipeline identified 305 indicators of compromise (IOCs) from public threat intelligence feeds. Phishing targeting analysis shows activity across: gaming (19), crypto (9), social media (6). A notable characteristic is the abuse of legitimate hosting platforms — GitHub Pages (16), Webflow (12), Vercel (9) — to evade domain reputation-based blocklists. Observed TTPs map to 7 ATT&CK tactics: Persistence, Reconnaissance, Resource Development, Defense Evasion, Credential Access, Collection, Privilege Escalation. Immediate blocking of all listed indicators at perimeter controls is recommended, along with a retrospective search of proxy and DNS logs.
