1. Resumo Executivo

On June 24, 2026, the automated CTI collection pipeline identified 305 indicators of compromise (IOCs) from public threat intelligence feeds. Phishing targeting analysis shows activity across: gaming (28), social media (18), banking/delivery (12). A notable characteristic is the abuse of legitimate hosting platforms — Vercel (34), GitHub Pages (25), Blogspot (17) — to evade domain reputation-based blocklists. Observed TTPs map to 8 ATT&CK tactics: Reconnaissance, Resource Development, Persistence, Collection, Defense Evasion, Initial Access, Discovery, Privilege Escalation. Immediate blocking of all listed indicators at perimeter controls is recommended, along with a retrospective search of proxy and DNS logs.
